

Cory Finlinson

## **Energy Solutions Foundation Scholarship**

Cory Finlinson, a sophomore at Delta High School, attended the EnergySolutions Foundation Scholarship banquet at the Little America in Salt Lake City on April 27, 2007. Cory was the recipient of a \$2,000 scholarship.

The EnergySolutions Foundation Scholarship program provides money for students to apply toward a bachelor's degree program in math, science, or engineering at a college or university of their choice. Scholarships are awarded to 10th grade students who qualify for the program. The long term-goal is to help create the next generation of mathematicians, scientists, and engineers for America's future.

The EnergySolutions Foundation is a merit-based scholarship competition recognizing excellence in academics. The scholarship program is offered in designated areas to one student per high school and is based on the following criteria: confirmed enrollment in 10th grade at an accredited public high school this academic year, minimum GPA of a 3.5 on a 4.0 grading scale and must maintain a 3.5 GPA while in high school, planning to enter a bachelor's degree program in math, science, or engineering at an accredited university or college, a U.S. citizen or a permanent resident, and active participation and leadership in school, work, and extracurricular activities.

"Education is the most powerful weapon which you can use to change the world." Nelson Mandela.
